

3M™ Perfect-it™ III Ultrafina™ SE 50383

Polish for Rotary Swirl and
Hologram Elimination.

- Removes swirls and holograms
- Ultimate high gloss finish productivity
- Designed for use on rotary polishers
- Increases productivity and efficiency
- Quick easy clean up
- Minimal sling
- For Refinish and Original paint systems

Concerned about Swirl and Hologram elimination ?

3M™ Perfect-it™ III Ultrafina™ SE - the perfect answer for final rotary polishing

Rotary compounding and polishing processes in final stages of paint rectification inevitably leave fine circular scratches in the surface of the vehicle paint finish. These circular swirl marks may also be further highlighted in good lighting (eg sunshine) as "hologram" diffraction patterns.

These are often only covered up by final polishes or wax products or rectified with additional lengthy processing with a dual-action (DA) machine.

3M™ Perfect-it™ III Ultrafina™ SE Polish is designed to remove all swirls and holograms using standard electric or air-powered rotary polishing machines (1000-2500 rpm). The polish is used in conjunction with a new ultra-soft 3M™ Ultrafina™ SE High Gloss Polishing Pad for excellent, fast results after standard machine compounding and polishing processes. For a final wipe clean, the new 3M™ Ultrafina™ Polishing Cloth 50400 helps achieve the ultimate swirl and hologram-free, high gloss finish.

Hologram patterns are often evident after final compounding and polishing.

Below: application of 3M™ Perfect-it™ III Ultrafina™ SE removes the swirls and holograms to leave a perfect finish.

Product	Part No.	Size
3M™ Perfect-it™ III Ultrafina™ SE Polish	50383	1 litre
3M™ Perfect-it™ III Ultrafina™ SE high gloss polishing pad	50388	150 mm
3M™ Perfect-it™ III Ultrafina™ SE high gloss polishing pad	50389	200 mm
3M™ Perfect-it™ III Ultrafina™ Polishing Cloth	50400
